## Removing God changes everything.

Religious leaders like Martin Luther King, Jr. fought for human freedom and dignity based on the Biblical understanding that all men are created equal. The freedom we Americans enjoy was inspired by their Judeo-Christian principles. But now we watch while secularists work to purge God and religion from every part of public life. As today's religious leaders, we have a responsibility to speak up. It's a difficult task, but there is help. *The Birth of Freedom* documentary will provide you with the tools to enter the debate. Why bother? Because a world without God can never be truly free.
