

WHY POOR COUNTRIES FIND OUR SOLUTIONS TO GLOBAL WARMING HARD TO SWALLOW.

For the projected cost of Kyoto in just the year 2010, the biggest health problem facing mankind could be fixed. We could provide clean drinking water and sanitation for every person in the world. Permanently.

Currently one billion people in the world use unsafe sources of drinking water. As a result of this contaminated water and lack of basic sanitation, 4,500 children die each day.

Worrying about deaths from

global warming is, at best, a case of misplaced priorities. Obviously, we can't ignore any real global warming threats. But, with limited resources, we need to make smart, moral choices about what we do.

Technological advancement

is the key to controlling environmental pollution. And it takes wealth to make those advancements. If saving lives is our goal, we must advocate policies that will help developing countries prosper.

If you value human dignity as much as the environment, visit our website. Find valuable educational materials and connect with sound economic thinkers. Together, we can turn environmental concern into effective, moral action.
